

William Austin
06/03/2023
Exercise 2.3

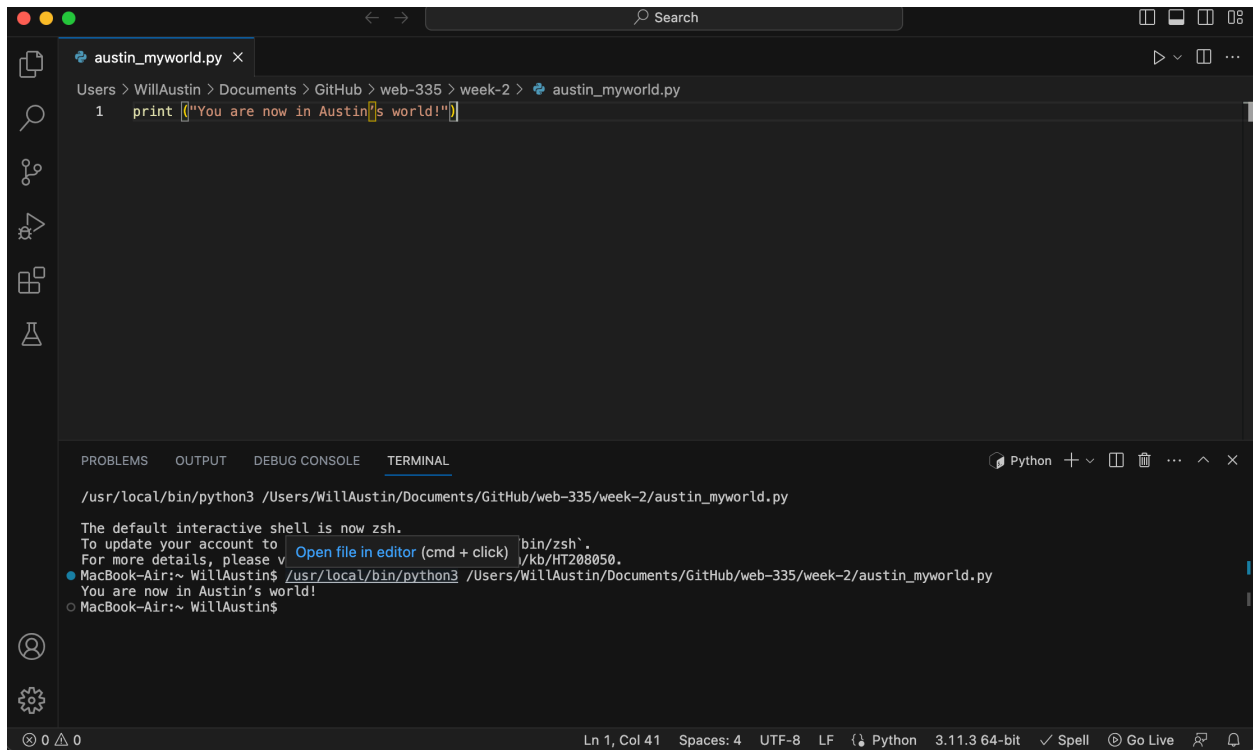

Opened the VSCode extensions tab and searched for Python. Then Installed the extension

Followed the prompts to select Python Interpreter and used the default path

Started coding

The screenshot shows a code editor with a dark theme. The top bar includes a search icon and the text "Search". The editor has a tab for "austin_myworld.py". The file path is "Users > WillAustin > Documents > GitHub > web-335 > week-2 > austin_myworld.py". The code in the editor is:

```
1 print(f"You are now in Austin's world!")
```

The bottom panel shows the "TERMINAL" output. The command executed is `/usr/local/bin/python3 /Users/WillAustin/Documents/GitHub/web-335/week-2/austin_myworld.py`. The output is:

```
The default interactive shell is now zsh.  
To update your account to bin/zsh'.  
For more details, please visit https://kb/HT208050.  
MacBook-Air:~ WillAustin$ /usr/local/bin/python3 /Users/WillAustin/Documents/GitHub/web-335/week-2/austin_myworld.py  
You are now in Austin's world!  
MacBook-Air:~ WillAustin$
```

The status bar at the bottom shows "Ln 1, Col 41", "Spaces: 4", "UTF-8", "LF", "Python", "3.11.3 64-bit", "✓ Spell", "Go Live", and a bell icon.
